THE BRAINS BEHIND THE LATEST ADVANCES IN NEUROSURGERY

"IT'S WONDERFUL TO BE PART OF

a team that fully commits itself to making sure things go well for our patients. It's the kind of effort we make every day.

But the commitment Community Medical Centers made in neuroscience excellence is truly rare – bringing the latest and only intra-operative imaging technology to the Valley.

With these new image-guided surgery tools, we can easily find a tiny tumor deep in the brain, see the critical structures to avoid and know how the brain is reacting as we remove the tumor. All with amazing accuracy.

Now we can serve the needs of our patients with greater precision and less risk. That's the kind of commitment to excellence that benefits our entire community."

**Dr. Don Myers, Medical Director
for Neurosciences
Community Regional Medical Center**

The most advanced surgical navigation technology in the world...

...allows for real-time assessment of a tumor's size and location for greater accuracy during surgery...

...with surgical imaging that constantly updates images to a computer screen located just inches from the surgeon's hands.

WITHIN THE COMMUNITY MEDICAL CENTERS NETWORK ARE MANY ADVANCED TECHNOLOGIES AND DISTINCTIONS.

Heart

Two years in a row, *Fresno Heart & Surgical Hospital* is named best in the region for cardiac services by HealthGrades®.

da Vinci® Surgical System

The da Vinci Robotic Surgical System at *Community Regional Medical Center* provides advanced minimally invasive prostatectomy surgery.

In Vitro Fertilization

Clovis Community Medical Center is home to the region's only fully accredited Level-3 fertility program.

CyberKnife®

Community Regional was first in the world to use the "Gen 4" CyberKnife, a revolutionary knifeless procedure that treats tumors throughout the body.

Leon S. Peters Burn Center

The region's only burn center provides comprehensive inpatient and outpatient care at *Community Regional* in downtown Fresno.

Research

At *Community* more than 200 research projects and clinical trials are under way through UCSF Fresno Medical Education Program, California Cancer Center and our CyberKnife program.
